## PROFILE SUMMARY

Total Worked on **4.10** years of experience expertise as an **Automation and Manual Testing Engineer** (Individual Contributor & Selenium Automation) with hands-on experience in **Selenium WebDriver** and **Automation Frameworks (Data-Driven with POM)**.

- Strong experience in **Automation Testing Frameworks** including **TestNG, BDD Cucumber, and TDD**.
- Skilled in **automation of object repositories and test data management** from multiple data sources including **Excel, XML using Apache POI**.
- Experienced in establishing and enforcing **standard test processes and deliverables**, including defect management and quality metrics reporting, to streamline both **manual and automation testing**.
- Hands-on knowledge of **Web Application Automation** using Selenium WebDriver with **Java**, TestNG, **BDD Cucumber, Maven**, **REST Assured**, **API**, and **UI Automation testing using Playwright**
- Strong capability in **gathering and analyzing requirements** from clients and stakeholders, translating them into technical requirements, and providing effective solutions.
- Proficient in **writing and maintaining test cases**, delivering **Requirement Traceability Matrices (RTM)**, monitoring, documenting, and reporting defect status for each testing cycle and overall project.
- Familiar with **Agile methodologies**, lifecycle management tools like **JIRA**, and established **software testing standards and best practices**.
- Experienced in **creating test estimations, test plans, and test cases**, executing them, managing schedules, conducting reviews, and reporting results effectively.
- Hands-on experience in **Automation testing using Playwright**, including automation of e-commerce applications like **General Store** and **API Demos Application** during learning projects.

## TECHNICALSKILLS

**Development/Programming Tools**: VS Code, Eclipse, IntellijIdea , Postman
**Testing Tools**: Selenium, TestNG, Playwright,
**Project Management**: JIRA
**Version Control**: GIT, GitHub
C**I/CD**: Jenkins ,Maven ,Docker
**Languages**: Core Java, JavaScript, Python
**Database**: MySQL, AWS, MongoDB
**Operating System**: Windows, MacBook

### ORGANISATIONAL EXPERIENCE

Worked as a QA Test Engineer in Precognitas Technologies Pvt.Ltd *March 2025 – Present*

- involved in testing healthcare web applications with a focus on functional, UI, and API validation.
- Responsible for creating test cases, executing manual and automation tests, logging defects, and ensuring end-to-end quality delivery. Executed automation test scripts using playwright with JavaScript
- Performing functional, regression, smoke, and sanity, database testing
- Collaborating with cross-functional teams in an Agile environment
- Writing API and GUI Test cases and execute test cases, review test cases.
- Database Testing validating GUI With data check the data on GUI Correct or not.
- Writing API and GUI Test cases and execute test cases, review test cases.
- Database Testing validating GUI With data check the data on GUI Correct or not with the help of s3 bucket notes from AWS cloud services
- Selenium grid ,and Selenium Automation with Java connected Docker tools
- rest Assured Automation with Java and Playwright with Java Script automation.

Worked as a **Automation Test Engineer TantranZm Technologies Pvt. Ltd.**
*July 2024 – March 2025*

- Worked on the BharatPe UPI Payment and Loan Application project, testing QR-based payment transactions, fund transfers, and loan application workflows.
- Performed manual and automation testing to validate payment processing, KYC verification, loan approval, and EMI repayment functionalities, ensuring secure and reliable user experience. Worked on automation test scripts using Selenium grid
- Write API and GUI Test cases and execute test cases, review test cases.
- Worked on framework enhancement and test execution
- Database Testing validating GUI With data check the data on GUI Correct
- Involved in defect tracking and reporting using JIRA
- Backend Automation with rest assured and Collection Automate.
- Collaborated with developers to analyze issues and ensure timely defect resolution.

Worked as a **Automation Test Engineer EasyRewardz Software Services Pvt. Ltd.**
*May 2024 – July 2024*

- Contributing to testing of a Loyalty Management Application used for customer rewards and engagement programs. Project Details: The application enabled users to enroll, earn and track reward points, and redeem rewards; I performed manual and automation testing to validate user journeys, reward calculations, transaction processing, and system stability. Validation points.
- Writing API and GUI Test cases and execute test cases, review test cases.
- Participated in sprint planning and daily stand-ups
- Created and maintained API test cases in Excel with request parameters and expected results.
- Playwright Automation with JavaScript and Selenium with java and rest Assured Automation

Worked as a **Automation Test Engineer Daphnis Software Services Pvt. Ltd.**
*January 2021 – May 2024*

- contributing to testing of an Info Solutions CRM application for customer and business process management. Performed manual and automation testing to validate lead management, customer data handling, workflow automation, reporting features, and overall system reliability.
  Designed and maintained automation frameworks (Data-Driven, POM)
- Executed manual and automation test cycles across multiple releases
- Prepared test cases, RTM, affect reports, and test summary reports
- Coordinated with cross-functional teams to deliver quality releases on time.
- Maintained proper test documentation and ensured requirement coverage.
- Execute Automation test script and share report to manager.
- Writing API and GUI Test cases and execute test cases, review test cases.
- Database Testing validating GUI With data check the data on GUI Correct or not with the help of s3 bucket notes from AWS cloud services
- Selenium grid ,and Selenium Automation with Java connected Docker tools

## Key Result Areas (KRAs)

- Defined, implemented, and tracked **Key Performance Indicators (KPIs)** for the testing

team to measure quality, efficiency, and delivery; coordinated and supervised **offshore/offsite testing resources** as required.

- Performed **end-to-end testing, troubleshooting, and debugging** of web, API, and mobile applications; provided ongoing **application maintenance and enhancement support** to ensure product stability and customer satisfaction.
- Led and managed **testing operations**, including **test estimation, test case prioritization, test execution**, and **review of test reports and testing artefacts** to ensure high-quality deliverables.
- Followed **project life cycle methodologies** (Agile/Scrum) as defined in the process framework, ensuring **on-time delivery within project scope and budget constraints**.
- Analyzed and mapped **client and business requirements**, participated in **requirement evaluation, scope definition**, and finalized test requirements by collaborating with stakeholders to deliver optimal solutions.
- Configured and tested software applications; **designed, developed, and executed test plans and test cases** for functional, regression, smoke, and sanity testing across multiple releases.
- Documented, tracked, and communicated **test plans, test results, defect metrics, root cause analysis**, and unresolved issues; prepared **Test Summary Reports** along with **daily and weekly status reports** on testing progress and defect status.
- Monitored and analyzed **automated test executions**, assessed testing efforts, and provided **accurate test estimations** to support release planning and sprint commitments.
- Ensured delivery of projects **within defined timelines without compromising quality standards**, while actively contributing to **test management activities and test automation initiatives** to improve overall testing efficiency

## Highlights

- Conceptualized and implemented **strategic automation roadmaps** and designed **customized automation frameworks**, including **Hybrid Framework approaches**, tailored to specific **project requirements** and scalability needs.
- Performed **browser compatibility testing** across multiple environments and actively worked in **Agile (Scrum) methodology**, following **SDLC best practices** throughout the testing life cycle.
- Developed and executed **comprehensive test plans** to ensure overall project quality, covering **functional, security, performance, and scalability testing** aspects.

## Education Details

- **BA(IT):** Veer Bahadur Singh Purvanchal University, Jaunpur, Uttar Pradesh, India
- **Diploma(CS) :** Board of Technical Education, Uttar Pradesh (BTEUP)
- **12th:** UP Board, Allahabad (2018)
- **10th:** UP Board, Allahabad (2016)

## Personal Details

Date of Birth : 29th Aug 1999
Languages Known : English, Hindi
Current Location : Noida
Marital Status : Single
